

Things you need from the lead before you submit it to the platform

By: Edgardo González, Mentor – Solar Expert Consultant

Dear Powur Advisor/ Consultant

Let's start with the right foot by gathering all the info needed to create a successful proposal.

Electric bill : Is Important that you get “all pages not blurry” don't cut corners, the full page must be in the picture! Take it with flash and will not be blurry!

Always upload in your back office the page that contains the graphic with the usage in KW. If the bill does not have the Kw usage is your responsibility to find it and upload the usage where the bill is supposed to be uploaded.

Important: If you do the above, You still need to upload the full bill on the notes section of the lead or the project will not move forward!

1-Full name

2-Phone

3-Address

4-Email

5-Years of roof

6-Type of Roof: Metal, Shingles, wood , concrete, Clay?

7-Main breaker Panel Amps? 100, 125, 150 or 200 amps? (If you don't know just take a picture of the main breaker panel and the interior door label and send it to me)

8- HOA? If yes- name email and phone number of contact person

9-social security and DOB (this last one is optimal if you want to
Pre-qualify the lead on credit)

100% of this info is needed, don't skip one single one of them.

Square footage -optional

Date of birth (this is optional but will help you if you can get it)

Winners don't miss a thing:)
